Our 2018 event brought individuals all around the globe from more than 75 organizations together to share business and digital transformation lessons learned, best practices and case studies representing all facets of people, processes, and technology. We had two days of keynotes and panels with speakers who were cross-industry executives within aerospace, agriculture, automotive, building infrastructure, defense, medical, regulatory, and technology. They shared their business transformation stories and real-case studies within the full spectrum of people, processes and technology. The event focused around key topics of:

The Digital Thread and Twin | Operational Excellence | Enterprise Configuration Management | Industry 4.0 | IoT | Organizational Change Management | Diversity and Inclusion
