FOR IMMEDIATE RELEASE

Janeen Henning Joins IpX as Chief of Transformation

DENVER, Colorado, 30 November 2021 — The Institute for Process Excellence (IpX) is excited to announce that Janeen Henning has joined the IpX team as Chief of Transformation.

With more than 35 years at APTIV (formerly Delphi) as a cross-functional leader, Janeen brings a wealth of experience across Operations, Purchasing, Engineering, Product Line Management, Portfolio Management, Configuration Management, and Contract Manufacturing. Her previous roles as Program Manager, Systems Engineering Manager, and Global Configuration Management Manager consisted of managing and training international teams, complex problem solving, driving increased cycle and production times, and providing detailed customer engagement.

Janeen's most recent position as Global PMO Manager and Launch Excellence Manager included performing escalation management for senior leadership and creating risk management processes. She supported more than 200 project managers and leaders in 14 global design centers along with training, coaching, process assessment, project reviews, global project coordinator leadership, and launch readiness. Janeen holds a Master of Science Degree in Manufacturing Management from Kettering University, completed Six Sigma Black Belt training, and a CM2-Comprehensive certification.

As Chief of Transformation within the IpX services organization, Janeen will lead clients through a holistic approach to transformation and provide advice and guidance to business leaders and owners. Assessing the availability and readiness of resources within the organization along with identifying and closing capability gaps is the core of the IpX True North Enterprise Calibration Model. Janeen will be responsible for incorporating agile ways of working to accelerate initiative launch and portfolio definition and funding. She will ensure business transformation governance enjoys a clear decision-making hierarchy with the right people involved and have the right mandate to act on matters paramount to success. The Chief of Transformation ensures a pragmatic metrics framework is used to govern transformation performance from organizational change through to business process and data management, competitive intelligence, and every aspect of transformation.

About IpX

IpX's education sector is the premier industrial resource for configuration management, systems engineering, operational excellence, digital transformation, and high-performance culture training with courses offered worldwide.
